

Bioplastic Production Made of Olive Seeds

PROBLEM

Every year 400M tons of plastic is consumed worldwide.

PETROL BASED PLASTICS

Toxication

Pollution

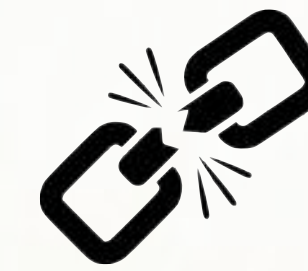

Regulations

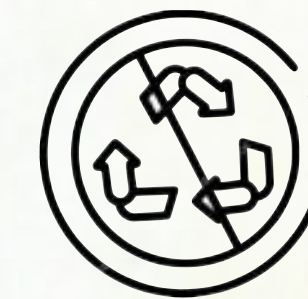

PLANT BASED BIOPLASTICS

Cost > +150%

Low strength & durability

Complications in recycling

Eco-friendly solution made of olive waste.

Biolive is a biotechnology enterprise that designs and develops the production process of bio-based plastics (from olive seeds).

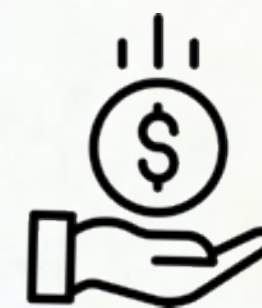

First to market

Friendly to human health

Low CO2 emission & sustainable

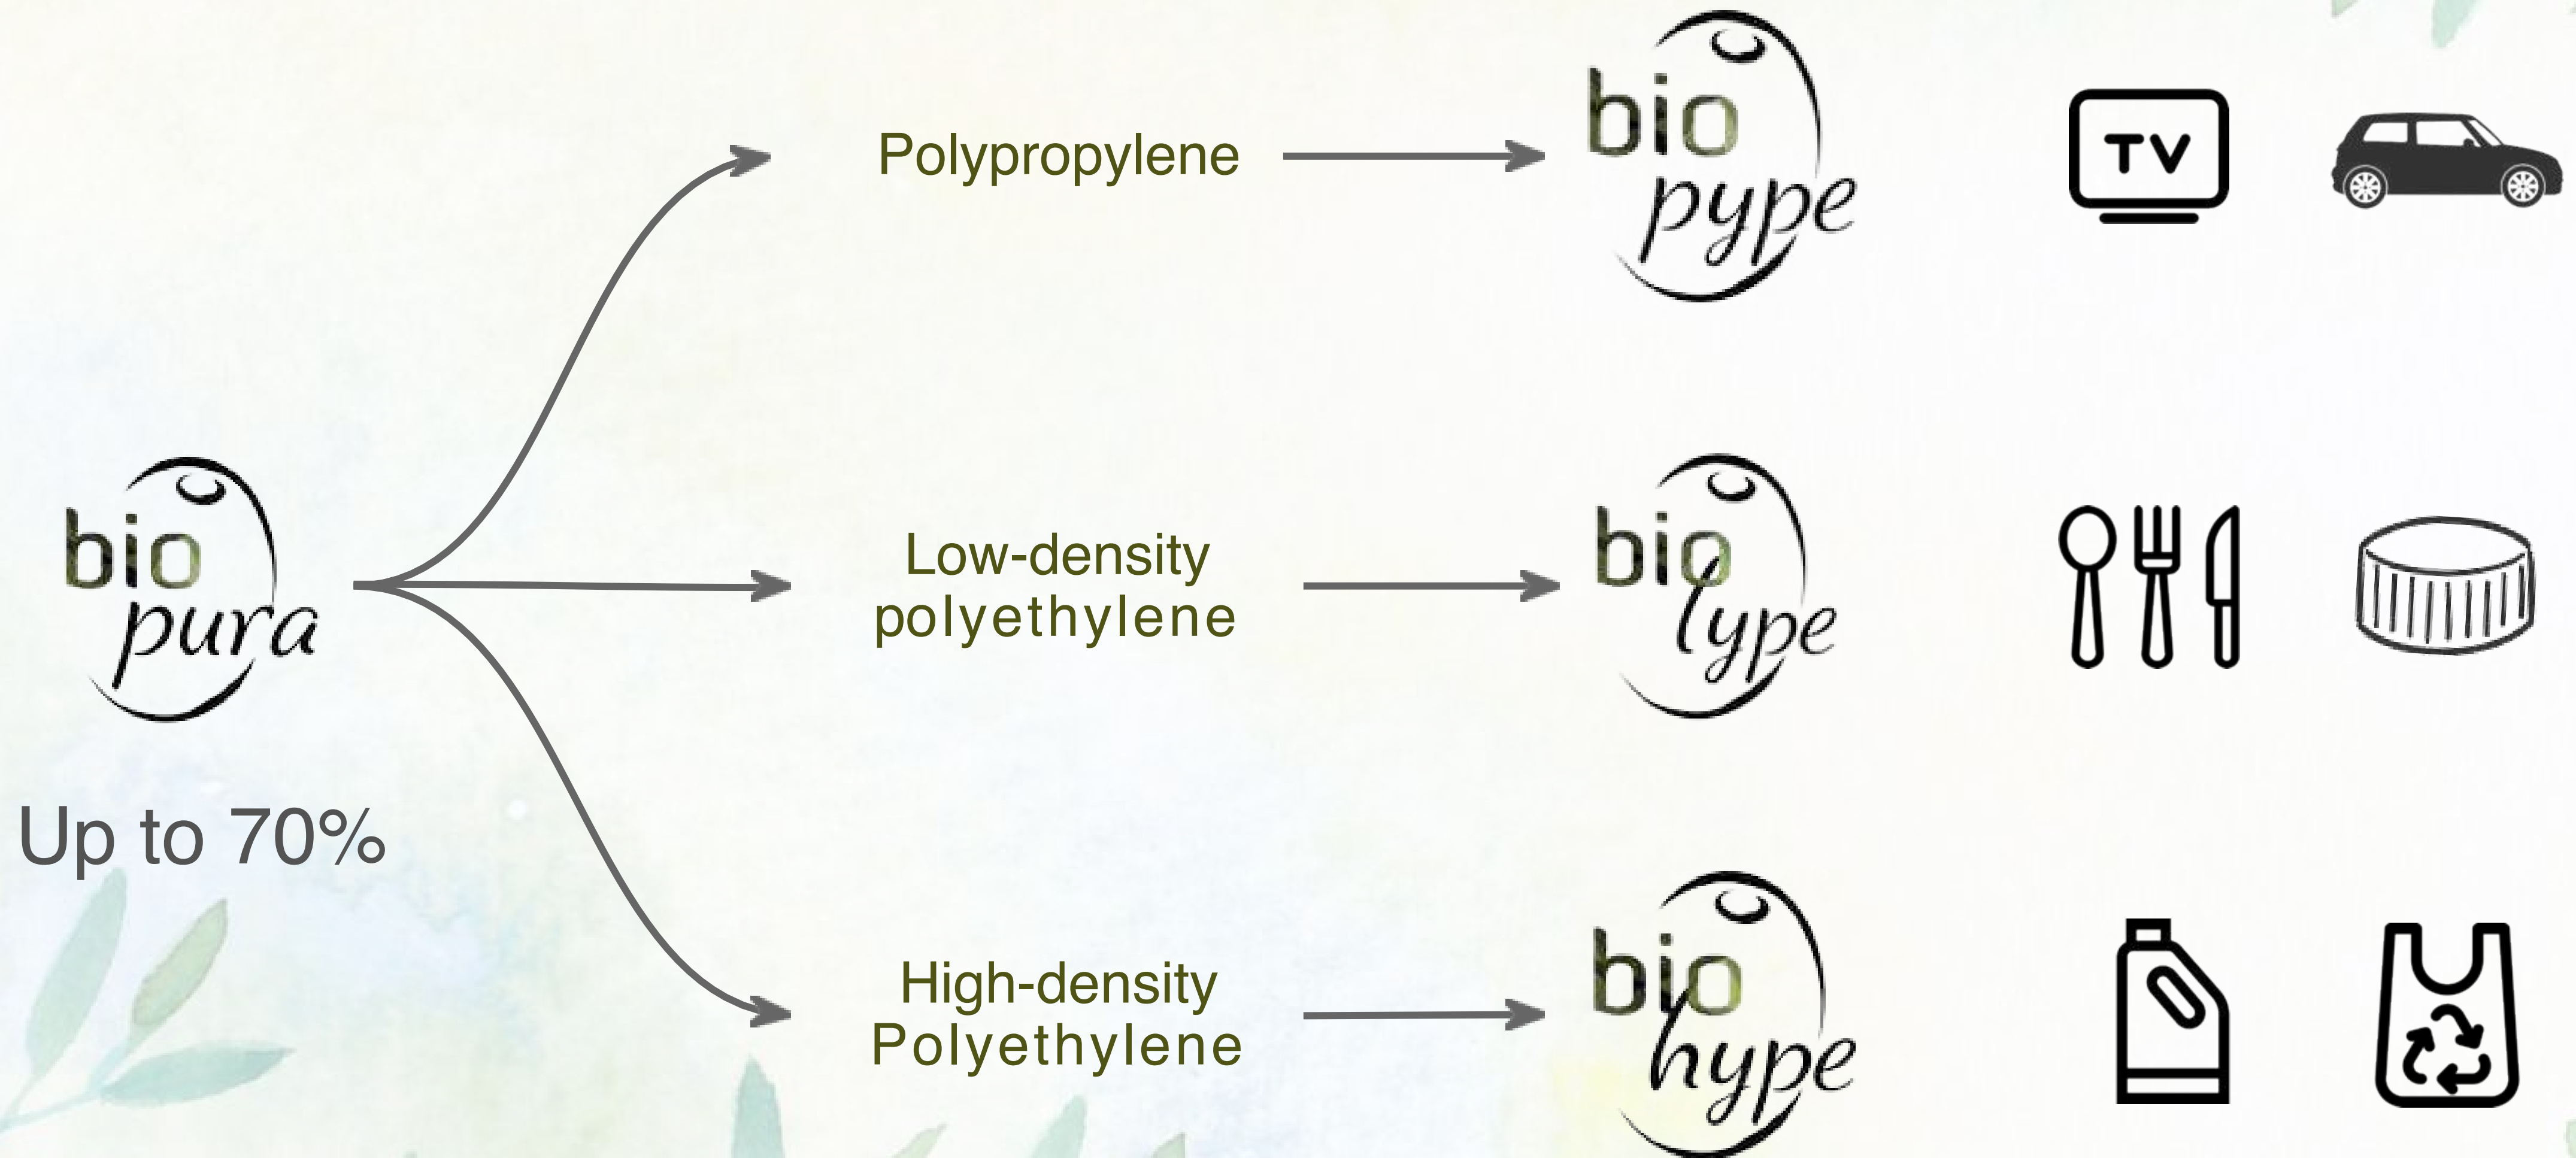

Cost effective

Bio Based

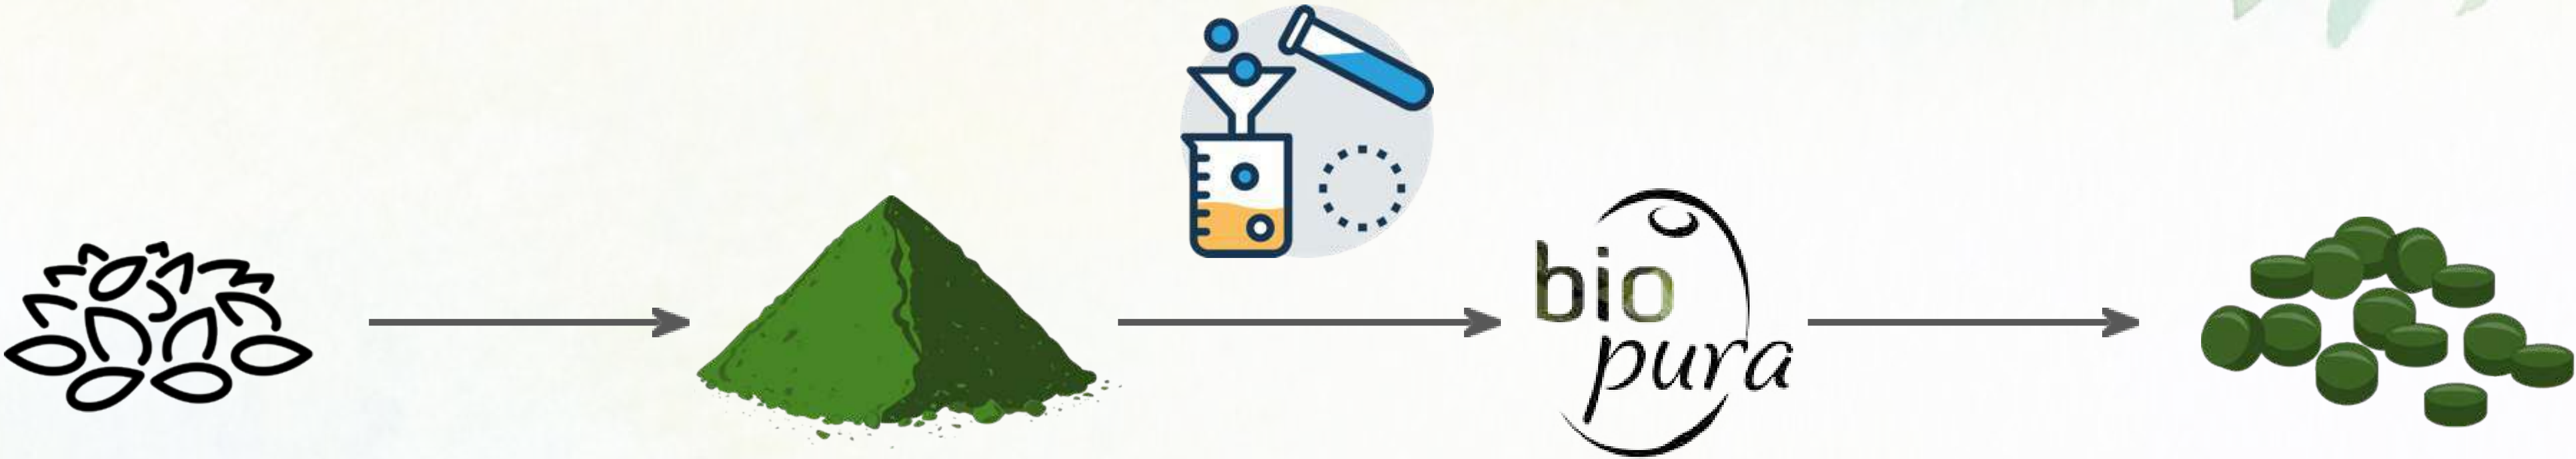

Biolive produces and provides bio based granules.

All products are certified according to U.S. standards.

From olive seeds to bioplastics...

Olive Seed

Olive Seed Powder

Bio-pura® Bioplastic Material

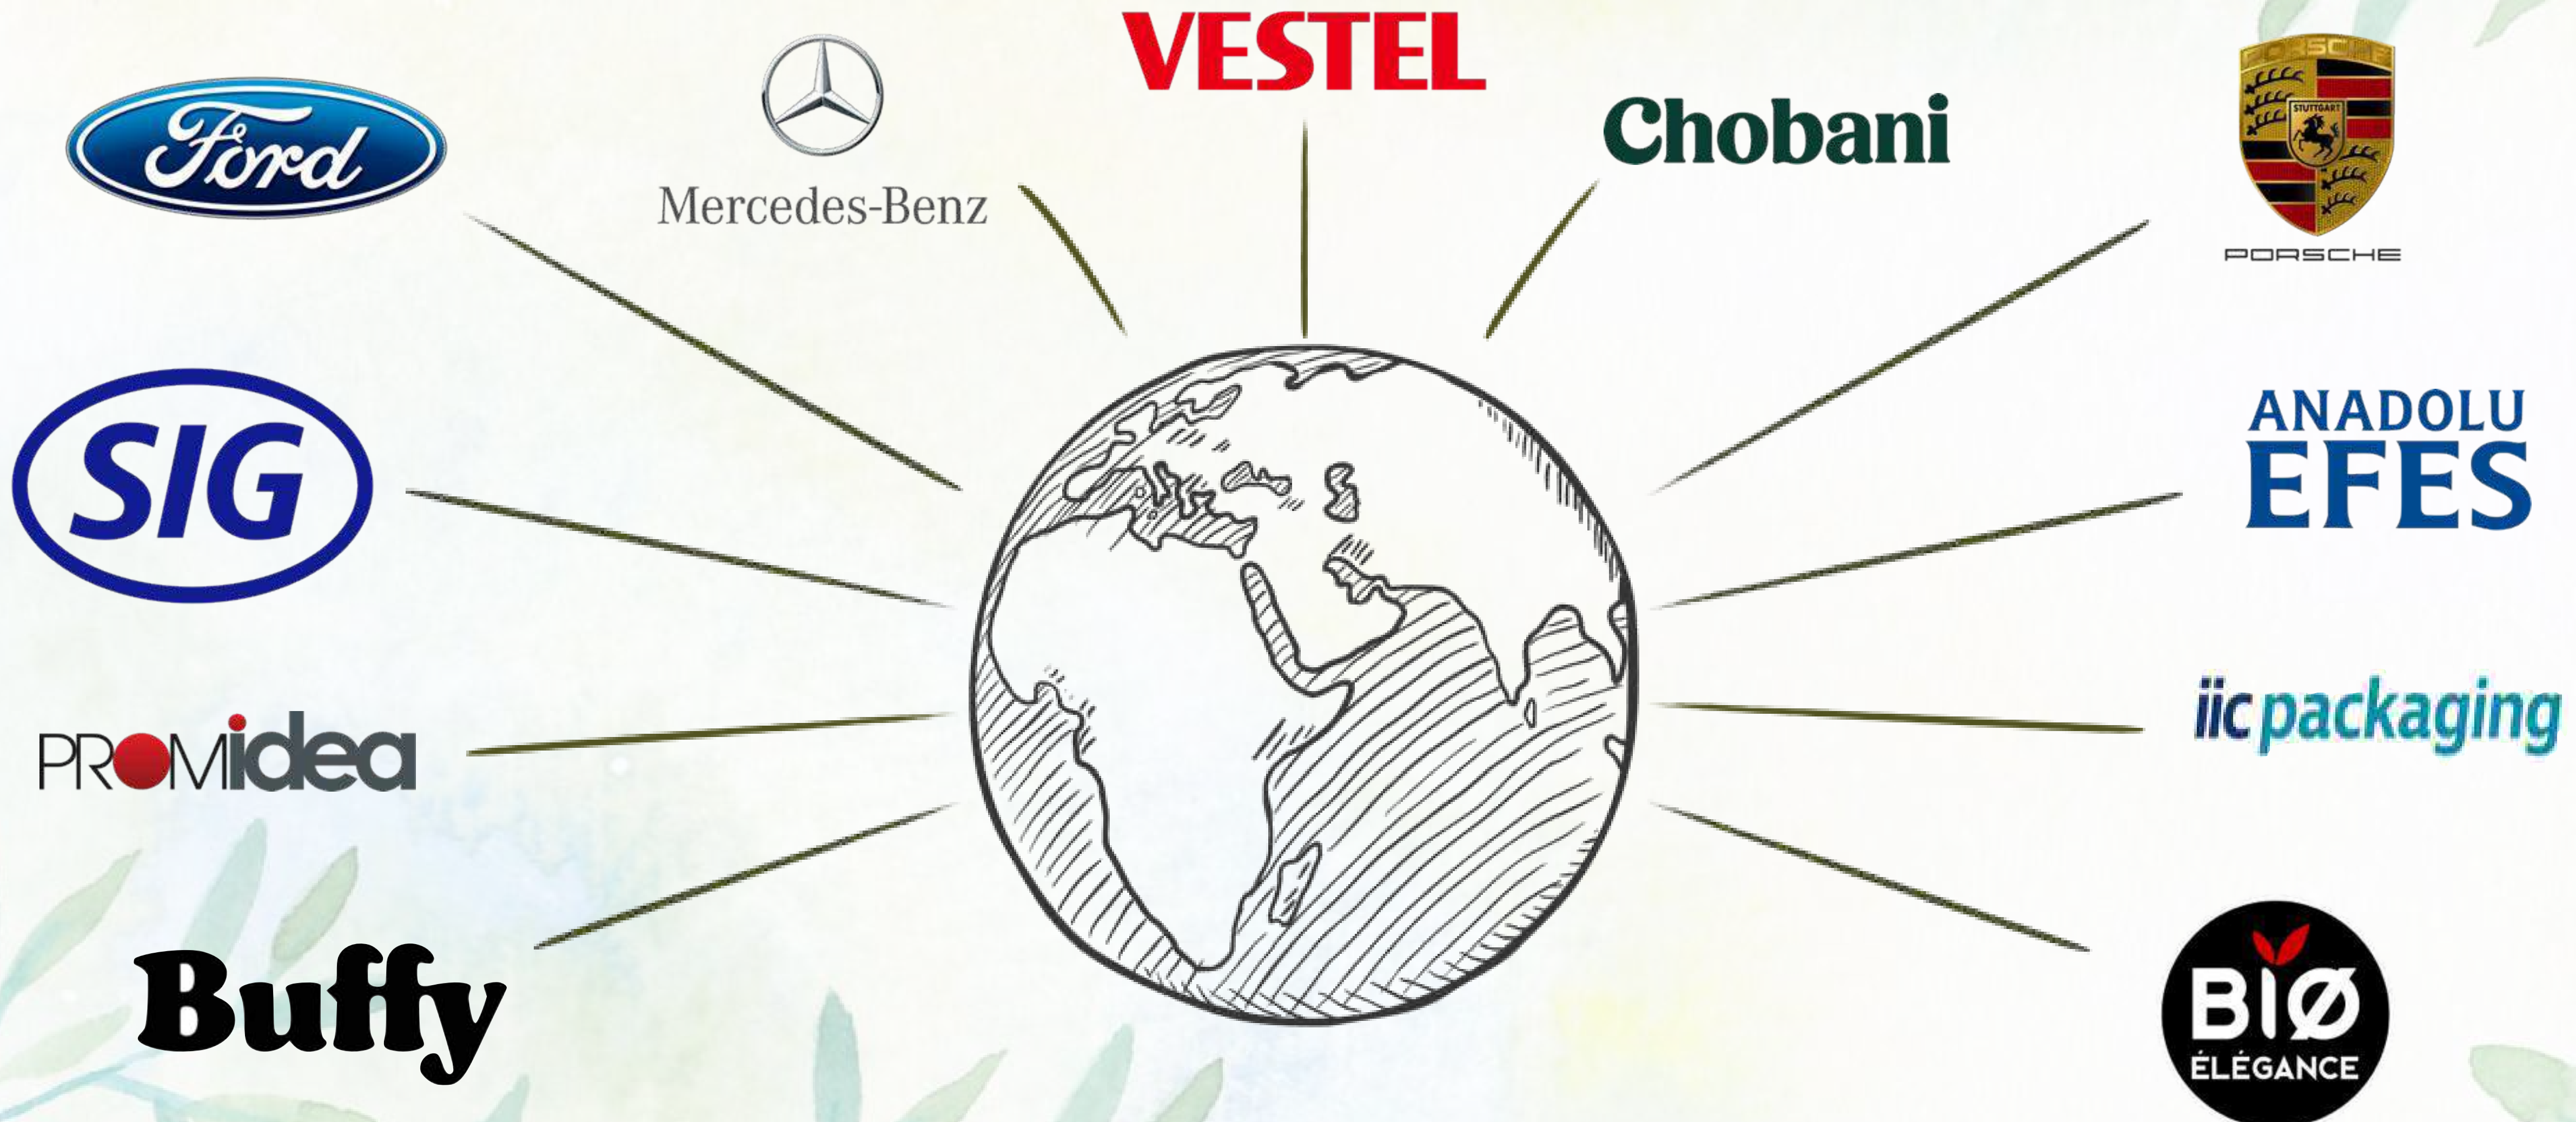

Compounded granules

6M tonnes waste (World)

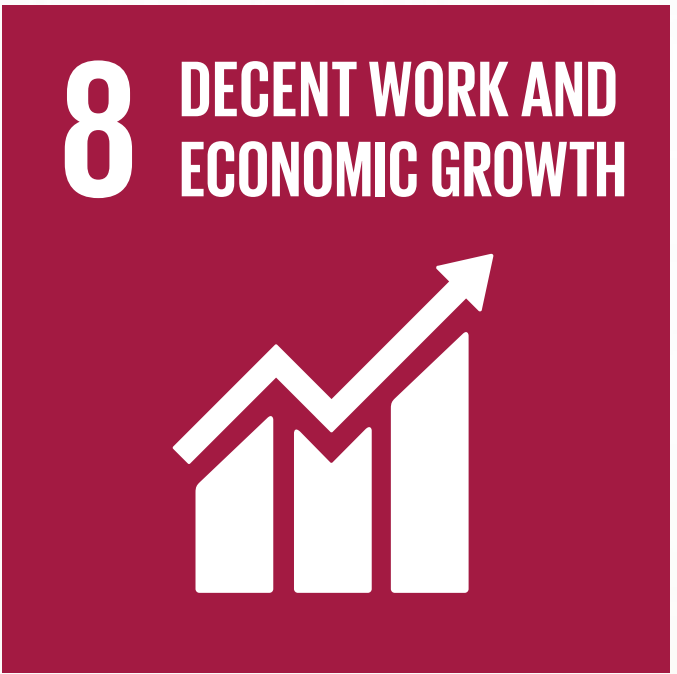

500K tonnes waste (Turkey)

ALL TECHNOLOGY WAS PATENTED VIA PCT.

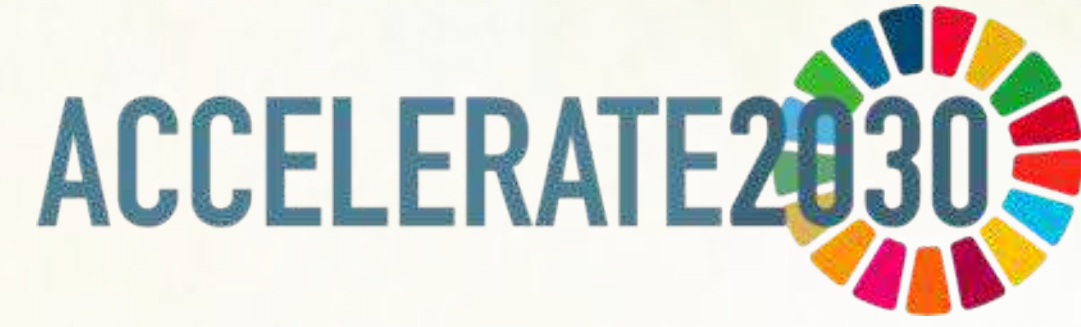

Biolive has worldwide customers from 5 different sectors.

Biolive follows the same goals with Sustainable Development Goals.

Biolive is the winner of Accelerator2030, which is in partnership with UNDP. We will represent Biolive in Switzerland.
